What will I study in my first term?

This is a National Extended Certificate in Applied Human Biology. In the first week, the course will focus on mainly GCSE Human Biology content to provide a base foundation with the use of experiments in small groups to help cement understanding around the main human biology themes.

Are there any books I need to buy or useful websites I should look at?

There is no need to buy any textbooks! Throughout the course, your teacher will suggest websites to assist with your independent research for each part of your coursework portfolios. If you do want to look at anything before you start, visiting the Pearson Edexcel website to preview the Medical Science specification is a great place to start.
